

PHIL 321  
Lecture 27: The Modes of Skepticism  
12/3/2013

**For Board**

What would Aristotle cite as the four aitiai of a house's being built?

The Academics often appealed to phenomena like identical twins, grains of sand, etc. to argue that any true impression can be matched by a false impression? Why would this conclusion, if correct, be threatening to Stoic epistemology?
